1973 Annual Summary

I.F.A.S. - Univ. of Florida

Honey produced in the United States during 1973 totaled 238 million pounds--up 11 percent from the 1972 crop, according to the Crop Reporting Board. This year's honey crop was produced by 4.1 million colonies, nearly the same as the previous year. Yield of honey per colony was 58.1 pounds, compared with 52.6 in 1972. Beeswax production totaled 4.2 million pounds in 1973, up 6 percent from 1972.

In mid-December, producers reported 37.8 million pounds of honey on hand for sale, compared with the low stocks of 29.8 million pounds the previous year. Stocks in mid-December were 15.9 percent of the 1973 honey production compared with 13.9 percent in 1972.

Florida was the leading honey producing State in 1973 with 33.5 million pounds followed by California with 31.0 million pounds. Minnesota and South Dakota were third and fourth with 15.3 million pounds and 14.4 million pounds, respectively.

Honey producers received an average of 44.4 cents per pound for honey during 1973, 47 percent above the 1972 average price of 30.2 cents per pound and the highest price on record. These prices relate to all wholesale and retail sales, extracted, chunk and comb honey from apiaries owned by farmers and nonfarmers.

Extracted honey in wholesale lots sold for an average price of 42.2 cents per pound, 15.1 cents above 1972. Unprocessed bulk honey in 60 pound containers averaged 42.0 cents per pound compared with 27.2 cents in 1972. Sales of processed bulk honey averaged 43.7 cents per pound, 13.9 cents higher than a year earlier. Processed packaged sales averaged 52.1 cents per pound compared with 37.2 cents in 1972.

In 1973, prices received for retail sales of extracted honey averaged 56.3 cents per pound or 13.2 cents above 1972.

Sales of all chunk honey (wholesale and retail) averaged 68.1 cents per pound, 16.7 cents above a year earlier. Prices for all comb honey averaged 65.1 cents per pound compared with 52.6 cents in 1972.

Commercial production (apiaries with 300 or more colonies) in 20 major States totaled 131 million pounds. This is more than was expected in September and accounts for 55 percent of the Nation's 1973 honey flow. The commercial honey crop in the 20 States was produced by 1.6 million colonies.
